

- 
- The diagram illustrates the layout of a two-page spread with various safety and production margins. A central vertical dashed line represents the fold. The left page is mostly blank, while the right page contains a legend in the bottom right corner. The legend defines four types of margins and lines: a light blue square for a 2 mm bleed area, a dashed line for the cut line, a light pink square for a 3 mm safety margin, and a dashed line for the fold line. The entire spread is enclosed in a dashed border, and the pages are separated by a vertical dashed line.
